PERSONAL STATEMENT

Hey there
I'm AmirReza ! I study computer science and I'm so eager for it. In my opinion, a great developer should think creatively to approach the team's goals in a short time! Another important thing about me is that I know teamwork and I'm receptive to the comments of others because I have lots of team work experience in high school. So I think I'm prepared to be a member of your company to work for you and learn a lot from you!

Sincerely, SAFEHIAN
